a great work

starts from details

PRESSBOLT

Our Profile

We put ourselves to the test and now have the chance to show you why you should choose us.

For more than 30 years Pressbolt has been specializing in manufacturing studbolts, nuts and special fasteners.

Quality, service and flexibility is our business philosophy.
Our production facility measures over **10.000** sqm and it is fully equipped with innovative high tech manufacturing machinery and the latest computer technology.
Our strength is based on a skilled team of over 60 people, thus allowing us to produce a wide range of special fasteners promptly, competitively and to the highest possible levels of quality.

Our stock

We offer a wide range of material easily accessible, with short lead times.

Our extensive stocks of fully certified materials enable us to rapidly respond to our customer's demand and to manufacture a wide range of quality products.

We stock a full range of 55.000 items in 7.000 sqm utilizing: low alloy steel, stainless steel, duplex/superduplex and nickel base alloy steel complying with the following ASTM A193 B5, B6, B7, B7M, B16, B8, B8M, B8C, B8T, B8R, B8S - ASTM A320 L7, L7M, L43, B8, etc... - ASTM A453 660 grade A, B, C, D - ASTM F467/F468 UNS N06625, N10276, N04400, standards etc…

Quality Assurance

We provide high quality products at competitive prices as we know that quality at the lowest price are one of the most important requirements.

We commit ourselves to produce high quality products aiming only to our customers' satisfaction.
In addition to quality approvals from many major known international entities, Pressbolt is also EN ISO 9001:2008 certified.
This certification ensures constant quality control, which is maintained throughout all the stages of production.
Our internal laboratory performs inspections at the earliest stages, on incoming raw materials, upto the final products.
On request, inspections and tests are carried out by third party entities (Agencies such as Lloyd Register, T.U.V., Bureau Veritas, I.S.P.E.S.L.).

Main Products

- studbolts
- hex cup screws
- hex head screws
- hex nuts
- double ended studbolts
- anchor bolts
- special bolts according customer drawing
- hex plugs

Coatings

- electro zinc plating
- electro cadmium plating
- hot dip galvanizing
- PTFE Coating
- phosphate coating
- electroless nickel plating
- zinc nickel coating
- aluminium coating
- silver coating

Test and Laboratory

Pressbolt performs, within its own laboratory, destructive and non destructive testing such as tensile test, impact test, chemical analysis, PMI, hardness test, magnatest comparison, salt spray test, digital thickness gauge UT - MT - PT.

Application Fields

- chemical & petrochemical
- offshore
- subsea applications
- civil constructions
- power stations
- nuclear power plants
- wind energy
- solar energy
- environment

HOMOLOGATIONS CERTIFIED BY A CERTIFIED BODY

- ISO 9001:2008
- AD MERKBLATT W0 (ed.2000)
- PED 97/23/EC ANNEX I PART 4.3

(Pressure equipment directive 97/23/CE)

Dimensional Range

¼" (M5) up to 7" (M160)
other sizes to be evaluated during contract review.

Standards

ASTM - ASME - AFNOR BS - DIN - UNI - EN

Certifications

EN 10204 2.1 / 2.2 / 3.1 / 3.2

Logistic & Production capacity

We maintain a 24h free production capacity, which is planned day by day, allowing us to support every type of requirement, prompt delivery and/or emergencies.

Pressbolt is proud to boost its sales on a worldwide scale focusing its attention particularly towards Italy, Europe and the Gulf Area.

The performance on delivery is guaranteed by an integrated automated information system with a highly flexible production.
